

PIXMA TS4150i

KEY FEATURES

Wireless Printing

Wi-Fi
Print wirelessly with your smart devices.

Fast Printing

Fast Print Speeds
14 ipm mono / 9 ipm colour

Sharp Black Text

Pigment black ink
Improved text durability and sharpness

Mobile Device Printing

Mobile printing
Print, scan, and copy from smart devices

PIXMA PRINT PLAN

PIXMA Print Plan compatible
Cost-effective ink subscription service

Auto 2-sided Print

Auto 2-Sided
Print on both sides of the page with ease

PIXMA, NEED IT, PRINT IT.

The Canon PIXMA TS4150i is a compact and cost-effective wireless solution that takes the hassle out of printing, scanning, and copying at home. Featuring new ink optimisation technology for faster results in finer detail, and a simple operation with seamless mobile connectivity, it delivers high-quality documents and vibrant images in half the time.

NEW TECHNOLOGY

Increased print speed

The PIXMA TS4150i offers increased print speed compared to conventional models, thanks to an upgraded long-length print head and a greater number of nozzles. This means all models are equipped to achieve improved productivity with print speeds of 14 ipm mono and 9 ipm in colour. Print head improvements have also reduced graininess in dark areas, guaranteeing the highest print quality for documents and photos with fast speeds.

Smartphone printing without the stress

Smartphone and tablet users can connect with a PIXMA printer with the Canon PRINT app. This enables seamless document and photo printing straight from the device. Users can simultaneously handle a conventional Wi-Fi connection via a router as well as Wireless Direct, which doesn't require an internet connection. For further functionality, the Canon PRINT app offers extensive print, scan, and copy customisation, plus cloud service access.

INK COMPATIBILITY

Ink Cartridges

PG-595/595XL (Black), CL-586/586XL (Colour)

1. Document print speeds are the averages of ESAT in Office Category Test for the default simplex mode, ISO/IEC 24734. Photo print speed is based on the default setting using ISO/JIS-SCID N2 on Photo Paper Plus Glossy II and does not take into account data processing time on host computer. 2. Document print speeds are the averages of FPOT in Office Category Test for the default simplex mode, ISO/IEC 17629. Print speed may vary depending on system configuration, interface, software, document complexity, print mode, page coverage, type of paper used etc. 3. Ink droplets can be placed with a minimum pitch of 1/1200 inch. 4. Optical resolution is a measure of maximum hardware sampling resolution, based on ISO 14473 standard. 5. Copy speeds are the average of sFCOT and sESAT, ISO/IEC 29183. Copy speeds (ADF) are ESAT of copy in sequence, ISO/IEC 24735. Copy speed may vary depending on document complexity, copy mode, page coverage, type of paper used etc. and does not take into account warming up time.
