

AK-C4412 MEDICAL KEYBOARD MINI TP

Disinfectable Medical Keyboard with large touchpad

Models may vary from the image shown

Thanks to its compact size the waterproof AK-C4412 Medical Keyboard is perfect for areas with limited spaces. It comes with a high-responsive touchpad that allows for excellent cursor control as you know it from any PC mice. The disinfection capabilities makes it a perfect fit in hospitals and at medical practitioners, microbiological laboratories as well as industrial environments. The silicone key membrane protects the key pad of the AK-C4412 against the ingress of dirt and fluids and promotes a thorough wipe disinfection.

The ultra-flat key profile and the entirely closed surface is an effective barrier against cross contamination and the spread of germs. Equipped with the seamless closed membrane, the AK-C4412 corresponds to the requirements of the protection class IP68. The "CleanFunction" makes it possible to turn off the key pad while cleaning ("FN" + "Clean on/off").
