MidWay

Bakker Elkhuizen

**Small mobile mouse with subtle ergonomic angle.**

Everyone has different preferences when it comes to using a mouse, especially when it comes to vertical mice. If you are used to a traditional mouse, switching to an ergonomic mouse can sometimes be difficult. MidWay is for users who want to work more ergonomically but don't want to make an extreme change. The slightly tilted shape ensures a natural and relaxed hand position. It is precisely between traditional and vertical. Familiar to use, noticeably more comfortable and ergonomic!

Ergonomic background

Prolonged use of a traditional mouse can lead to increased muscle tension and discomfort in the hand, wrist, forearm and shoulder (Andersen et al., 2019; Oakman & Kinsman, 2021). Ergonomic mice with a moderate angle of inclination, between horizontal and fully vertical, offer an effective middle ground. These so-called hybrid or semi-vertical mice reduce the rotation of the forearm (pronation) compared to traditional models, while remaining familiar to the user in terms of operation (Lin et al., 2021). For users who want to prevent or reduce complaints but do not want to switch to a fully vertical mouse immediately, this type of mouse is an ergonomically sound and accessible solution.
